Trail 107	Good/Great
Trail 108	Good/Great
Trail 106/Corridor 19N	Good/Great

## Trail Report

**Note:** This information for this trail report was gathered BEFORE we received all of the rain on 2/14. We're working on assessing the current state of our trails and will release an updated report when we have more details.

Our trails remain in good to great shape, despite the recent warm weather. Trail 102 between 121 and 103 is not regularly groomed because of weight restrictions on the bridge. Expect this section to usually be rough. As always be mindful that our volunteer groomers and our tractor and drag are on the trail every day of the week. They may be going in the same direction that you are traveling but they also may be coming towards you. Keep this in mind especially around sharp curves. Use your head, watch your speed and be safe.

### **Notes:**

- Trail 102 between 121 and 103 is not regularly groomed because weight restrictions on the bridge will not support the tractor, so expect this section to be rough.
