## **Trail Report**

All of our trails have about a fragile 2" of base snow. The warmup over the weekend extends through the middle of this week. Our trails have held up pretty well, but the roads took a beating. The exception is Trail 101/Corridor 10W between the Onieda/Price county line and Musky Jack's. This section of the trail has deteriorated badly and is basically dirt. Reducing speed while riding, especially on curves, will help preserve our fragile base. Ride right. Ride sober. Ride with caution.
